

```
import React from 'react';

const withAuth = (WrappedComponent,isAuthenticated) => {
  return (props) => {
    // const isAuthenticated = props.isAuthenticated;

    if (!isAuthenticated) {
      return <div>Please log in to view this content.</div>;
    }

    return <WrappedComponent {...props} />;
  };
};

// export default withAuth;
```

```
const Dashboard = () => {
  return <div >Welcome to the dashboard!</div>;
};

export default withAuth(Dashboard,true);
```
